Session Notes Template

Here's a blank D&D session note page ready for you to use outlined according to
Return of the Lazy Dungeon
Master. Duplicate, date, and title the copy page for your new session.

Monsters

Calculate the deadly encounter benchmark by adding together all character levels and dividing by   if they're   th level or above or divide by   if they're   st to   th level. An encounter may be deadly if the sum total of monster challenge ratings is greater than half the sum total of character levels or one quarter of character levels if the characters are   th level or below.

Scratchpad

Jot down notes during your game. Use it for a text-based combat tracker or anything else. Copy and paste from here into Discord for example. Here's more on playing D&D and Discord and a Markdown-based battle map.
